

**Cool Snapdragons
give you unbeatable
uniformity across
all colours**

Cool Rose Snapdragon

Genetically matched
Cool is the best,
most uniform
Winter-flowering
snapdragon series.

PanAmerican Seed™

SNAPDRAGON 
Antirrhinum majus

Cool Series (Group 1,2)

Stem Length: 39 to 60 in./1 to 1.5 m
Supplied as raw seed.

The genetically matched Cool varieties offer uniformity across the series and within each colour for timing, height and spike quality. The strong and sturdy stems have long and tight spikes with long tapers. This grower-friendly series is best produced under cool conditions for energy savings and is also the best series for dependable harvest during the cool months. Cool is suitable for greenhouse or field cut flower production and is well-suited to outdoor growing or under tunnels in California Winter conditions. It is an excellent production companion to Delphiniums.
