

A woman with blonde hair, wearing a white jacket over a black top, is smiling and looking down at a large display of colorful pansies. The flowers are in various colors including purple, yellow, red, and white. In the background, there are more pansies and a white lattice fence. The overall scene is bright and cheerful, suggesting a nursery or garden center.

Pansies & Pansy Pals[®]

PanAmerican Seed[®]

Matrix[®] offers uniform growth in popular colors

NEW Matrix Clear Mixture

The growing characteristics of Matrix pansies allows the series to be grown to tight specifications, minimizing waste and unacceptable plant performance. All Matrix varieties flower within a 7-day window at 25% color so all colors from the same sowing – even the novelties – can ship at the same time. Superior branching means the plants cover the soil before flowering without stretching.

XXL handles the stress of Summer sowing to grow **big blooms**

XXL Yellow With Blotch

XXL Series can take the heat of June and July sowings and still deliver spectacular, extra-large flowers. Bring XXL in for early Autumn sales without changing your current growing practices. This full series is bred to stand up to the extreme heat and PGR stress that comes with June and July sowings. Large, robust plants are topped with extra-large flowers and foliage that fill out in the pot before flowering.
