

Mona Lisa™ F1 Anemone turns your centerpieces into masterpieces

Mona Lisa boasts vibrant, 4 to 4.5-in./ 10 to 12-cm blooms atop sturdy, thick, 18-in./45-cm stems, with yields of up to 18 stems per plant per year on average.

Mona Lisa™ Mixture Anemone

PanAmerican Seed™

ANEMONE 
Anemone coronaria

Mona Lisa™ Series

Height: 18 in./45 cm
Spread: 6 in./15 cm
Supplied as raw seed.

Ideal for cutting and design work, Mona Lisa will flower under lower light levels than other anemones, and is well-suited for young plant production from a March to April sowing in the Northern Hemisphere and a September to October sowing in the Southern Hemisphere. Low temperatures (46 to 54°F/8 to 12°C) promote optimum stem length for cut flower production. Compared with many other cool cut flower crops such as carnations, Mona Lisa is less labor-intensive, not requiring staking, netting or disbudding. Well-suited to greenhouse or field cut flower production.
