

Very early-flowering Prado produces approximately 7 to 10 stems per plant when pinched, with big and beautiful dark-centred flowers.

## **Prado Series**

Height: 4 to 5.5 ft. / 1.2 to 1.65 m Supplied as raw seed.

Very early-flowering Prado offers a totally unique type of multi-flowering cut sunflower. Approximately 7 to 10 stems per plant may be harvested when the main stem is pinched at the fifth set of true leaves. The dark-centered flowers are 6 in./15 cm in diameter. Very low humility or very high light levels can reduce stem length. Harvest Prado in approximately 10 to 12 weeks. Well-suited to greenhouse and field production.

Gold 1792 Red Shades 97921 Pollenless.
