PanAmerican Seed<sup>®</sup>

# serena® & serenita® angelonia

## No stick, no pinch...just sow and go!

Only two angelonia series deliver the looks and performance of vegetative varieties with the ease and economy of seed. Both Serena and "little sister" Serenita can be mechanically sown, and plants require no pinch, for less labour and lower cost than vegetative types.

*"We trialed Serenita Angelonia last year. We experienced great branching on the plants, and did not have to use any Bonzi for 1-gallon production. In the past, we've spent \$0.40 on Bonzi per plant. This variety really helped us cut costs. So this year we've switched all our Angelonia production from vegetative to seed."*

*Rick Brown  
Riverview Flower Farm, Florida*

**F1 ANGELONIA** 🌻  
*Angelonia angustifolia*

### Serena Series

**Height:** 16 to 20 in./40 to 50 cm  
**Spread:** 12 to 14 in./30 to 35 cm

### Awards & Recognition

Colorado State University 2012  
Kansas State University 2012  
North Dakota State University 2012  
Penn State University 2012

Texas A & M 2012  
University of Georgia 2012  
University of Tennessee 2012  
Walt Disney World Nursery 2013

**Both series thrive in sun and partial sun and are resistant to heat, drought, deer and rabbits. The difference? Serenita's naturally compact growth habit makes it more manageable for production in warmer climates and high-density situations. Also, Serenita can be grown sustainably, with less or no PGRs.**
