

Royal Tapestry Alternanthera PGR Response

4.5" Pot

**Bonzi 3 ppm
Drench**

**B9 5000 ppm
Spray**

**Bonzi 30 ppm
Spray**

Control

Applying a weekly spray of B-Nine at 5,000 ppm results in more compact plants with darker purple foliage (second pot from left). In warmer areas, such as Texas or Florida, a Bonzi drench at 3 to 4 ppm 1 week after transplant is more effective (pot on far left).
