# Linaria Enchantment

Recommended Plant Growth Regulator, published 2019

PanAmericanSeed.

## ANNUALS

### INTRODUCTION

To determine the recommended PGR and amount.

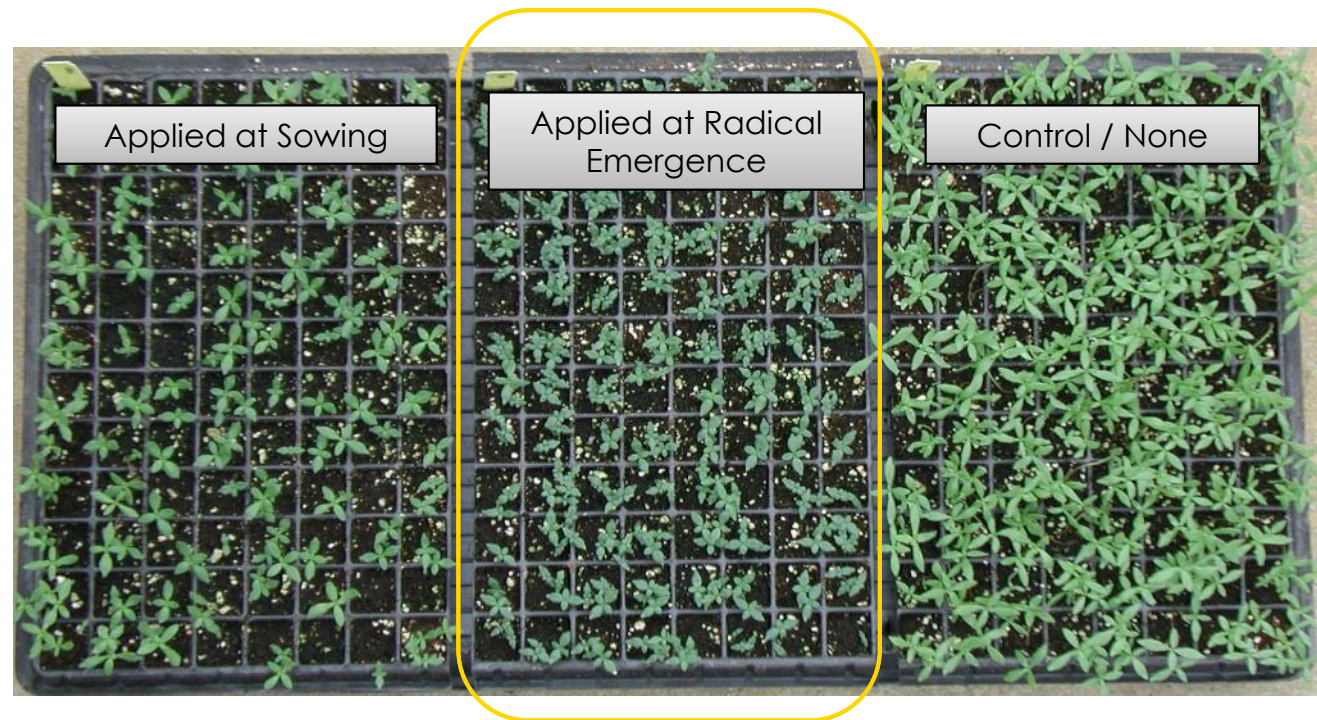

# Linaria Enchantment

Recommended Plant Growth Regulator, published 2019

PanAmericanSeed.

## ANNUALS

- PGR applied before or right after sowing could reduce germination.
- Apply PGR at radical emergence to control early plug stretch.

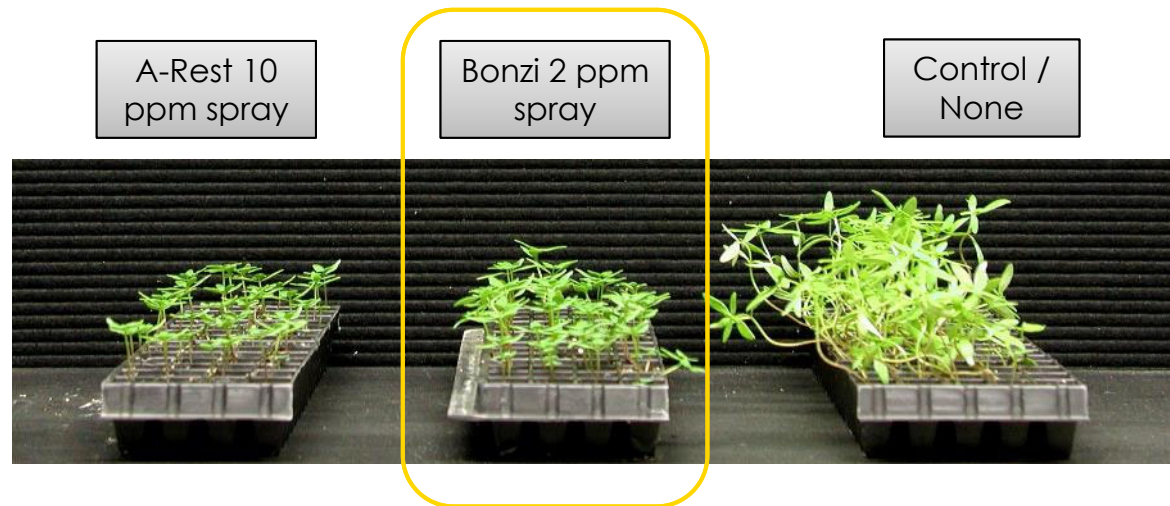

# Linaria Enchantment

Recommended Plant Growth Regulator, published 2019

PanAmericanSeed.

## ANNUALS

- Hypocotyls elongate quickly after radicle emergence.
- PGR at radicle emergence can effectively reduce seedling stretch.
- Paclobutrazol at 2 ppm or ancymidol at 10 ppm are effective.
- Repeat at ~2X higher rate a week later.

Recommended Plant Growth Regulator, published 2019

PanAmericanSeed.

## ANNUALS

- After transplant, paclobutrazol spray avoided floppy stems.
- Apply ~10 ppm a week after transplant, and then increase to 20-30 ppm when secondary shoots reach ~1.5 in.(4 cm).
- Repeat, if necessary.
