

Serena™

puts a **security** blanket on garden beds

Serena Mixture

Serena Series Angelonia

Seed-grown Serena is a low-maintenance, tough performer through all kinds of conditions. No-pinch, well-branched plants fill gardens with easy-care, continuous color.

The first-ever angelonia from seed can be economically produced for premium pack and landscape programs. Serena branches exceptionally well without pinching, producing full plants. Serena is heat loving with low-water needs, making it well-suited to landscapes, gardens and mixed containers.

White was one of 10 winners in the Classic City Awards at The Gardens at UGA in Athens, GA. "The plants were completely covered in clean, pure white flowers for months earning it this coveted award," said Allan Armitage.

The series received the FlameProof Award at the 2007 Dallas Arboretum trial. Jimmy Turner, Senior Director of Gardens, called it "absolutely best of genus."

PanAmerican Seed™

ANGELONIA ☀️
A. angustifolia

Serena™ Series F1

Height: 10 to 12 in. (25 to 30 cm);
plants grow up to 50% larger in Southern
conditions.
