

Katz Matthiola lets you harvest super- uniform stems *fast*

Katz Apricot Matthiola

Katz delivers a shorter crop time, uniformity in flowering and better heat tolerance than traditional field types.

PanAmerican Seed™

MATTHIOLA (STOCK) ☀️
M. incana

Katz Series

Location: Grow in tunnels rather than outside; can withstand heat well compared to traditional types
Stem length: 32 in./80 cm
Supplied as raw seed with 80% minimum germination standard.

Katz is similar to Japanese extra early-flowering types, and delivers shorter crop time, uniformity in flowering for stem length and timing between colours, good colour range, and better heat tolerance than European or traditional field types. Katz can be grown earlier or later in the season, and even year-round in some climates. The series is about 55 to 60% double-flowering, with some selectability possible. Tunnel production is recommended for overall improved quality and for weather production, so that programming is not affected by rain.

- New Apricot 783171**
- New Bright Rose 783173**
- Cherry Blossom 521908**
- New Lavender Blue 783172**
- Light Lavender 521910**
- Pink 521909**
- White 521880**
- Yellow 521907**
