Towering over other basil

The aromatic and vibrant licorice flavour of NEW 'Everleaf Thai Towers' complements any dish, especially Thai cuisine. This well-branched Thai basil variety with short internodes makes a beautiful, tidy, towering plant that has huge harvest potential and brightens gardens and mixed containers.

BASIL

Ocimum basilicum

New 'Everleaf Thai Towers'

Height: 24 to 36 in./61 to 91 cm

Spread: 8 to 12 in./20 to 30 cm

Seed supplied as: Raw

Herb Type: Thai

Plant Habit: Columnar, highly branched, late flowering, short internodes, upright, vigorous

Colour: Medium Green

Suited For: Extended harvest multiple cuts, hydroponic, pot, roots-on

Days to maturity from direct seed: 45-60

Days to maturity from transplant: 30-45

Production Method: Field, Hydroponic, In Ground, Container

- Flowers up to 10 to 12 weeks later than standard Thai basil with huge harvest potential.
- Well-branched variety with short internodes makes a beautiful, columnar plant that stays tidy for many uses, including in-ground, container gardens and hydroponics.
- Aromatic and vibrant licorice flavour complements any dish, especially Thai cuisine. Blends well when cooked in a curry or chop fresh on Pad Thai to experience full licorice aroma.
- Masses of medium-green leaves with occasional purple flecks and soft purple stems will brighten any retail display.

'Everleaf Thai Towers'

'Everleaf Thai Towers'

Everleaf Basil Collection L-R: Everleaf Emerald Towers, NEW 'Everleaf Thai Towers' and Everleaf Genovese

Stand out with unique foliage

Candy Cane Chocolate Cherry's variegated foliage stands out among all other vegetables at a young plant size. As the plant matures, green fruit with a unique white stripe changes to chocolate and cherry red. Be sure to add this stunning variety to your vegetable program.

PEPPER ●

Capsicum annuum

Candy Cane Chocolate Cherry F1

Height: 18 to 24 in./46 to 61 cm
Spread: 12 to 18 in./30 to 46 cm

Seed supplied as: Raw

Type: Sweet

Class: Mini bell

Habit: Medium

Fruit Colour: Green/white stripe to chocolate/red stripe

Fruit Size: 3.5-3.75 in./9-10 cm long x 2.5-2.75 in./6-7 cm wide, 3.5-4.5 oz. (99 to 128 g)

Days to maturity from transplant: (green) 55-60; (ripe) 70-75

Production Method: Field, In Ground, Container

- Mini bell pepper plant has unique, eye-catching variegated foliage.
- Early-maturing fruit ripens from green and white stripes to unique chocolate and cherry red stripes.
- Sweet flavour and crisp texture make it perfect for fresh eating at any stage of ripeness.
- Best in containers or in-ground, with or without support.

NEW
Pot-a-peño

NEW
Candy Cane Chocolate Cherry

Jalapeños in a basket!

Early-fruiting Pot-a-peño has a unique cascading habit that's perfect for a hanging basket or premium container. It's a great addition to any vegetable program!

New Pot-a-peño F1

Height: 12 to 15 in./30 to 38 cm
Spread: 18 to 20 in./46 to 51 cm

Seed supplied as: Raw

Type: Hot

Heat Level: 2 - mildly hot

Class: Jalapeño

Habit: Bush, cascading, medium

Fruit Colour: Green to red

Fruit Size: 3-4 in./8-10 cm long x 0.75-1.25 in./2-3 cm wide

Days to maturity from transplant: (green) 45-50; (ripe) 60-65

Production Method: Field, In Ground, Container

- Pot-a-peño's unique cascading habit is ideal for a hanging basket or container - a perfect addition to any patio or small-space garden.
- Early maturing means this will be one of the first peppers to fruit in the garden.
- Tons of jalapeño fruit grow under a dense canopy of small, dark green leaves.
- Harvest fruit green for a traditional spicy zip in any dish or allow to ripen to red for a sweet, spicy flavour.

NEW

Peppi Red

NEW

Peppi Yellow

New Peppi Series F1

Height: 36 to 48 in./91 to 122 cm
Spread: 24 to 36 in./61 to 91 cm

Seed supplied as: Raw

Type: Sweet

Class: Snack

Habit: Large, tall, vigorous

Growth: Indeterminate

Fruit Size: 3.5-4.5 in./9-11 cm long x 1.25-1.75 in./3-4 cm wide

Days to maturity from transplant: (green) 55-60; (ripe) 75-80

Production Method: Field, Protected Culture, In Ground

- These small, pointed fruits offer incredible sweetness and rich flavour.
- The fruit are often seedless and are great for snacking fresh off the plant.
- To produce seedless fruit, grow it in isolation from other (non-seedless) pepper varieties.
- If it is not isolated, it will produce larger, great-tasting fruit with just a few seeds.
- Best grown in-ground with support of stakes or a cage.

New Red Fruit ripens from green to red.

New Yellow Fruit ripens from green to yellow.

NEW

Peppi Cornissimo

Seedless sweet peppers

The Peppi pepper collection will grow seedless fruit under the right conditions! Grow plants in isolation from other, non-seedless peppers to produce seedless fruit that makes chopping quick and easy for recipes.

New Peppi Cornissimo F1

Height: 36 to 48 in./91 to 122 cm
Spread: 24 to 36 in./61 to 91 cm

Seed supplied as: Raw

Type: Sweet

Class: Corno

Habit: Large, tall, vigorous

Growth: Indeterminate

Fruit Colour: Green to red

Fruit Size: 6-7 in./15-18 cm long x 2.25-2.5 in./6 cm wide, 4-4.5 oz. (113 to 128 g)

Days to maturity from transplant: (green) 80-85; (ripe) 95-100

Production Method: Field, In Ground

- Extra-large corno-shaped fruit ripens from green to red, with outstanding thick walls, rich flavour and more sweetness than most large-fruited peppers.
- Fruit is often seedless, for less preparation time for chopping and cooking. Great on the grill or stuffed and baked in the oven.
- To produce seedless fruit, grow in isolation from other (non-seedless) pepper varieties. If not isolated, it will produce larger, great-tasting fruit with just a few seeds.
- Best grown in-ground with support of stakes or a cage.

A true garden star!

DarkStar is resistant to late blight, a common disease of tomato plants, and it has been tested for all common seedborne diseases, ensuring high-quality seed for propagation. You can rely on DarkStar to light up your vegetable program!

TOMATO ●

Solanum lycopersicum

New DarkStar F1

Height: 60 to 84 in./152 to 213 cm
Spread: 36 to 48 in./91 to 122 cm

Seed supplied as: Raw

Tomato Class: Large-Fruited

Type: Beefsteak

Habit: Indeterminate

Tomato Colour: Purple

Fruit Characteristics: Oblate, ribbed

Fruit Size: 2-2.25 in./5-6 cm long x 3-3.25 in./8 cm wide, 8-10 oz. (227 to 283 g)

Disease Resistance: HR: LB, V

Days to maturity from transplant: 70-75

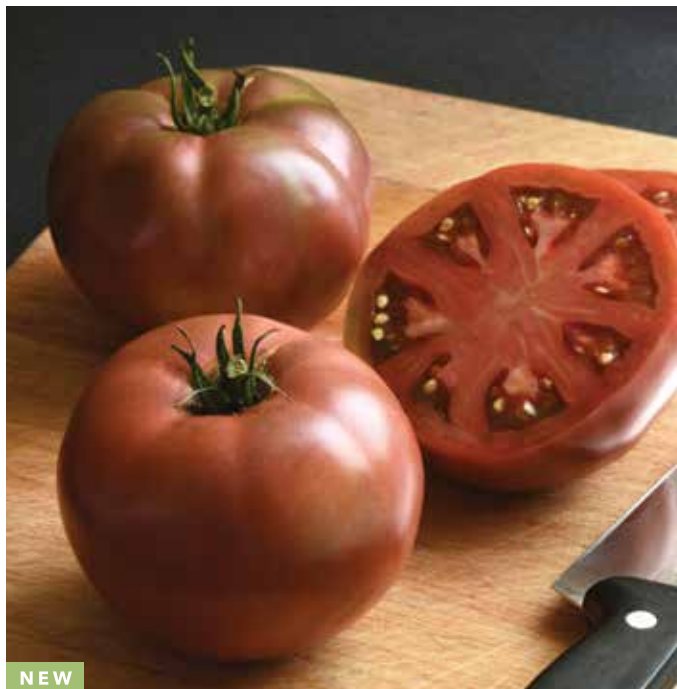

Production Method: Field, In Ground

- Upgrade your garden with heirloom tomato flavour *and* modern hybrid tomato performance.
- Early-maturing, rich, purple beefsteak fruit has higher yield potential and fewer blemishes than most heirlooms.
- Large, purple beefsteak fruit is perfect for eating fresh on a sandwich or try preserving in sauce.
- Offers high disease resistance to late blight, too.
- Best grown in the ground with support of a trellis or cage.

NEW

DarkStar

NEW

DarkStar

NEW

Bellatrix

New Bellatrix F1

Height: 30 to 36 in./76 to 91 cm
Spread: 24 to 36 in./61 to 91 cm

Seed supplied as: Raw

Tomato Class: Roma/Paste

Type: Roma

Habit: Determinate

Tomato Colour: Red

Fruit Characteristics: Oval

Fruit Size: 2.75-3 in./7-8 cm long x 2-2.25 in./5-6 cm wide, 4.5-5 oz. (128 to 142 g)

Disease Resistance: HR: F2, F3, LB, TMV, ToMV

Days to maturity from transplant: 65-70

Production Method: Field, In Ground, Container

- Bellatrix has high resistance to late blight, a common disease of tomato plants in northern climates.
- It also has resistance to Fusarium, a common root zone disease.
- Red Roma/paste tomatoes ripen in a short period of time, allowing for a large harvest for cooking sauce or making salsa.
- Best grown in the ground or in a large container, with or without support of a trellis or cage.

New Loki F1

Height: 60 to 84 in./152 to 213 cm

Spread: 36 to 48 in./91 to 122 cm

Seed supplied as: Raw

Tomato Class: Large-Fruited

Type: Slicer

Habit: Indeterminate

Tomato Colour: Red

Fruit Characteristics: Medium, round

Fruit Size: 2.25-2.5 in./6 cm long x 3-3.25 in./8 cm wide, 6-8 oz. (170 to 227 g)

Disease Resistance: HR: F1, F2, LM, N, TMV, ToMV

Days to maturity from transplant: 70-75

Production Method: Field, Protected Culture, In Ground

- Huge tomato flavour and performance.
- Early-maturing, round, red slicer fruit has higher yield potential and fewer blemishes than most heirlooms.
- Leaf mold resistance is great for growing in high tunnels or areas with high humidity.
- Best grown in the ground.

Loki

Marzito

New Marzito F1

Height: 60 to 84 in./152 to 213 cm

Spread: 36 to 48 in./91 to 122 cm

Seed supplied as: Raw

Tomato Class: Small-Fruited

Type: Specialty Small-Fruited

Habit: Indeterminate

Tomato Colour: Red

Fruit Characteristics: Elongated, mini marzano

Fruit Size: 2-2.25 in./5-6 cm long x 0.5-0.75 in./1-2 cm wide

Disease Resistance: HR: F1, LM, N, TMV, ToMV

Days to maturity from transplant: 50-55

Production Method: Field, Protected Culture, In Ground

- Versatile and perfect for all occasions - eating fresh off the vine or cooking up in a quick sauce.
- The elongated shape is reminiscent of a small Roma tomato, which is great for cooking.
- The firm texture and sweet, rich flavour mean it can be eaten fresh like cherry and grape tomatoes.
- Great disease resistance, too! Resistant to leaf mold, Fusarium, nematodes and tobacco mosaic virus.
- Best grown in the ground with support of a trellis or cage.
