## Meet the HandPicked Collection

PanAmerican Seed offers a novel, high-quality group of vegetables and herbs especially for those who supply fresh market farmers and hobby gardeners. What sets HandPicked varieties apart are their *fresh, home-grown flavor...exceptional fruit quality...earlier and longer harvests...loads of produce...some with compact habits to fit smaller growing spaces.*

### PEPPER-MANIA!

Gardeners and cooks want an array of flavors and sizes...you can deliver.

*Peter Piper would be proud of our pepper choices! Check out NEW Primero Red Habanero on the cover, then pop on over to **p 6**.*

### TASTIEST TOMATOES!

Nothing compares to a sun-warmed tomato fresh off the vine.

*Send flavors, sizes and shapes to market that are sure to please every palate, starting on **p 8**.*

### GROWING EASY!

Up your growing game with our all-in-one multi-pellets.

*Check out fast and flavorful SimplySalad™ mixes on **p 14** and SimplyHerbs™ on **p 16**.*

# cucumbers

**Gherking**

**Martini**

**Patio Snacker**

**CUCUMBER** 🌞  
*Cucumis sativus*

Seed supplied as: Raw

Name	Type	Fruit characteristics	Days to maturity from direct seed	Fruit size	Flower type	Disease resistance	Comments
<b>Gherking F<sub>1</sub></b>	European Pickler	Green skin, highly spined	55-60	3-5 in./ 8-13 cm long	Gynoecious, parthenocarpic	HR: CMV-1, S IR: DM, PM	Early, large yields of bitter-free fruit; won't become bitter if left on the vine. Great for high tunnel production and gardens lacking pollinators. Vigorous vines, best when trellised. Cylindrical, dark green gherkins with white spines are perfect for pickling and fresh eating. Best in-ground.
<b>Martini F<sub>1</sub></b>	American Slicer	White skin, slightly spined	55-60	5-6 in./ 13-15 cm long x 1.5-2 in./ 4-5 cm wide	Monoecious	IR: PM	Stands out from the competition for its non-yellowing, white exterior and earlier yields. Very tender, "no peel" skin if harvested at 5 to 6 in./13 to 15 cm length. Staying power in the heat of Summer. White interior is bitter-free, very sweet and crunchy. Best in-ground.
<b>Patio Snacker F<sub>1</sub></b>	American Slicer	Green skin, moderately spined	50-55	6-8 in./ 15-20 cm long x 1.5-2 in./ 4-5 cm wide	Monoecious, parthenocarpic		Controlled yet vigorous variety produces short, branching vines. Fruit has good flavor, crunchy texture and non-bitter peel. High-yielding with continuous harvest. Great for large containers with a small trellis; works well in pack/pot programs.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance  
Disease codes: CMV-1 - Cucumber Mosaic Virus Race 1, DM - Downy Mildew, PM - Powdery Mildew, S - Scab  
Flower Type: Gynoecious - predominantly female flowers, Monoecious - plants contain both male and female flowers, Parthenocarpic - plant has the ability to set fruit without pollination

11 x 7 in. /28 x 18 cm

Easy Pick Green Zucchini

NEW Butterbaby Butternut Squash

Honeynut Butternut Squash

EasyPick Gold II Zucchini

Name	Days to maturity from transplant	Fruit size	Fruit characteristics	Calyx color	Plant habit	Comments
Gretel F <sub>1</sub>	55-60	3-4 in./ 8-10 cm long (baby size); 4-6 in./ 10-15 cm long (full size)	White, elongated	Green	Upright, semi-spineless	Earliest white eggplant is highly productive, producing clusters of glossy mini-fruit that are tender and non-bitter. Indeterminate, 3-ft. (91-cm) plants can be grown in-ground or in large containers, with or without support. More productive and 5 to 7 days earlier to ripen than O.P. types. Slightly larger plant with slightly smaller fruit than Hansel. <i>All-America Selections National Winner.</i>
Hansel F <sub>1</sub>	50-55	2-3 in./ 5-8 cm long (baby size); 6-10 in./ 15-25 cm long (full size)	Black-purple, elongated	Green	Upright, semi-spineless	Early-maturing, highly productive variety produces clusters of glossy black-purple eggplants. Non-bitter, tender fruit can be used in many culinary recipes. Like white Gretel, the petite, 3-ft. (91-cm) plants can be grown in-ground or in large containers, with or without support. <i>All-America Selections National Winner.</i>
Patio Baby F <sub>1</sub>	40-45	2-3 in./ 5-8 cm long, 1 in./3 cm diameter	Purple, mini egg	Green	Compact, spineless	Unique, high-yielding, compact variety produces baby-size eggplants very early and continues producing throughout the season. Fits well into existing retail programs. Best in-ground and in containers. <i>All-America Selections Regional Winner.</i>

Name	Genus/species	Type	Exterior color	Days to maturity from direct seed	Fruit size/weight	Plant habit	Disease resistance	Comments
New Butterbaby	<i>Cucurbita moschata</i>	Mini butternut	Light tan	100-105	4-6 in./10-15 cm long; 3-4 in./8-10 cm wide 0.5-1.5 lb./227-680 g	Restricted vine	IR: PM	Produces many sweet, personal-size butternuts. High proportion of uniform fruit - around 1 lb./454 g each - means less grading for the fresh market farmer and satisfaction for the home gardener. Best in-ground; can be grown on trellis to save even more space.
Honeynut	<i>Cucurbita moschata</i>	Mini butternut	Dark tan	105-110	4-5 in./10-13 cm long; 2.5-4 in./6.5-10 cm wide 0.5-1 lb./227-680 g	Restricted vine		Produces exceptionally sweet, small fruit that are manageable to prepare. The first widely adaptable small-fruited butternut squash in a high-germinating, uniform strain. Higher yielding than traditional varieties. Best in-ground.
Easy Pick Green F <sub>1</sub>	<i>Cucurbita pepo</i>	Zucchini	Dark green	45-50	Harvest from a very small size with a flower attached, up to 10 in./25 cm long	Bush		Easy Pick Series is well-matched, smooth-textured and can be grown and marketed together. Open habit with nearly no spines on the petioles for easy and continuous harvests with no pain and less scarring on fruit. Parthenocarpic variety means that plants will produce fruit without insect pollination. Best in-ground.
Easy Pick Gold II F <sub>1</sub>	<i>Cucurbita pepo</i>	Zucchini	Gold	45-50	Harvest from a very small size with a flower attached, up to 10 in./25 cm long	Bush	IR: PRSV, WMV, ZYMV	

Disease terminology: HR = High Resistance, IR = Intermediate Resistance  
Disease codes: PRSV - Papaya Ringspot Virus, PM - Powdery Mildew, WMV - Watermelon Mosaic Virus, ZYMV - Zucchini Yellow Mosaic Virus

La Bomba II Jalapeño

Sweet Heat

Mad Hatter All-America Selections National Winner

Name	Genus/ species	Days to maturity from transplant	Fruit characteristics	Plant habit	Disease resistance	Comments
HOT PEPPER						
Aji Rico F <sub>1</sub> ))	Capsicum baccatum	70-75 to full ripe, 50-55 to green	Conical, green to red L: 3-4 in./8-10 cm W: 1.25-1.75 in./3-4 cm	Extra large, vigorous		Unique hybrid hot pepper has more vigor, higher yield and earlier ripening than O.P. heirlooms. Narrow, conical fruit with delicate citrus flavor and medium heat is crispy and thin-walled - perfect fresh or cooked, green or red. Best in-ground; large indeterminate plants benefit from a support. All-America Selections National Winner.
Cajun Belle ))	Capsicum annuum	60-65 to full ripe, 45-50 to green	Mini bell, green to red L: 2-3 in./5-8 cm W: 2-3 in./5-8 cm	Medium		Produces bell peppers with mildly spicy taste just right for fresh eating and salsa. Harvest green or red. Best in-ground and in containers. All-America Selections National Winner.
New Primero Red F <sub>1</sub> Habanero ))))	Capsicum chinense	75-80 to full ripe, 60-65 to green	Habanero, green to bright red L: 2.75-3.5 in./7-9 cm W: 1.25-1.5 in./3-4 cm	Large	IR: TSWV	Earliest ripening habanero on the market, with fruit ready to harvest as early as bell peppers. Produces huge yields of fruit larger than other standard habaneros, with just about one-third the heat. Early flowering - can be sold in large pots with flowers and immature fruit. Best in containers or in-ground.
La Bomba II F <sub>1</sub> Jalapeño ))	Capsicum annuum	65-70 to full ripe, 50-55 to green	Jalapeño, green to red L: 3-3.25 in./8 cm W: 1-1.5 in./3-4 cm	Large, tall	HR: BLS 1-3, TMV	Upgraded for superior disease resistance. Bears very large, high-quality jalapeños with little to no checking. Best in containers or in-ground.
Mad Hatter F <sub>1</sub> )	Capsicum baccatum	85-90 to full ripe, 65-70 to green	Unique disc, green to red L: 2-3.5 in./5-9 cm W: 2-2.5 in./5-6 cm	Extra large, vigorous		Flat-disc peppers are crunchy and crisp, with delicate floral scent and rich flavor that intensifies/sweetens as it matures. In hot, dry climates, a small number of fruit will have a touch of heat close to the seed cavity, but fruit wings are always sweet. Best in-ground with support. All-America Selections National Winner.
Sweet Heat F <sub>1</sub> )	Capsicum annuum	55-60 to full ripe, 40-45 to green	Snack, green to red L: 3-4 in./8-10 cm W: 1-1.5 in./3-4 cm	Compact		One of the earliest peppers to bear fruit! Compact, bushy plants let you ship or sell larger containers with developing fruit. Sweet and mildly spicy peppers can be harvested green or red. Best in containers or in-ground.
SWEET PEPPER						
Candy Cane Red F <sub>1</sub>	Capsicum annuum	60-65 to full ripe, 40-45 to green stripe	Snack, green/white stripe to red L: 3.5-4 in./9-10 cm W: 1.25-1.75 in./3-4 cm	Medium		Snack pepper has unique, eye-catching variegated foliage, plus fruit that ripen from green striped to solid red. Sweet flavor, thin walls, crispy texture. Perfect for fresh eating at any stage of ripeness. Best in containers or in-ground, with or without support.
New Snackabelle Red F <sub>1</sub>	Capsicum annuum	70-75 to full ripe, 55-60 to green	Mini bell, green to deep red L: 2-2.25 in./5-6 cm W: 2-2.25 in./5-6 cm	Compact	HR: BLS 1-3, 7, 8; TMV	Thick-walled, blunt-end peppers have rich, sweet flavor great for fresh eating from green to red, and hold up well through grilling and stuffing. "Easy-out" stem and seeds - simply push down or cut around cap to release seed cavity for quick cleaning. Best in containers or in-ground.

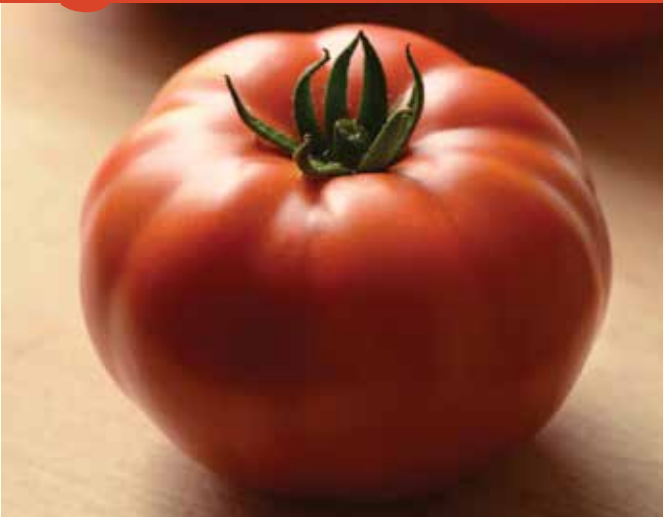

) = mild    )) = mildly hot    ))) = medium hot    )))) = hot

Heirloom Marriage Big Brandy

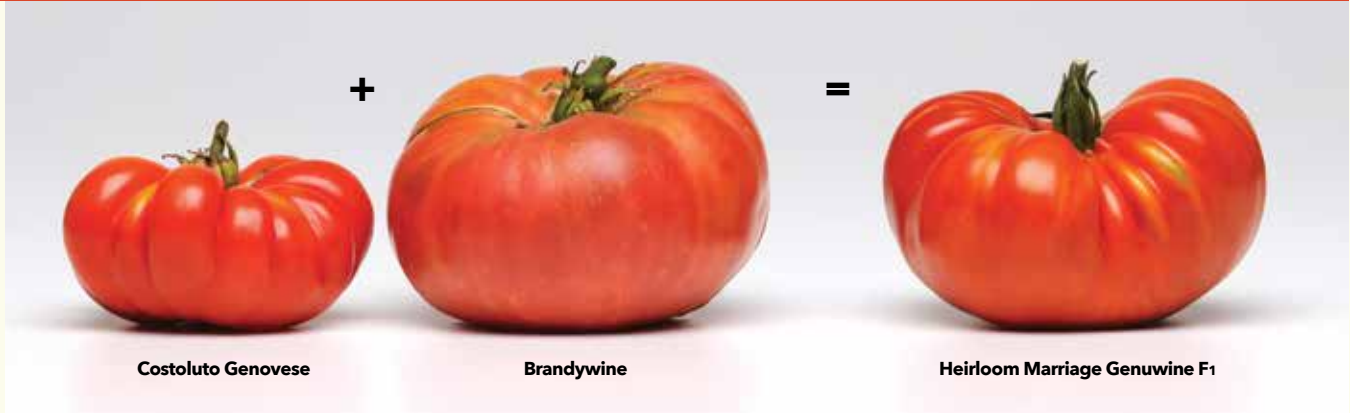

Heirloom Marriage Genuwine

Heirloom Marriage Cherokee Carbon

TOMATO 🌞  
*Solanum lycopersicum*  
(*Lycopersicon esculentum*)  
Seed supplied as: Raw

New twists on old garden favorites

We trialed hundreds of heirlooms for key traits like color, flavor, quality, yield. Our favorites were selected...crossed...tested and evaluated. The result: Heirloom Marriage™ hybrid tomatoes, with much higher yields and earlier maturity than their parents, plus all of the great flavor and less fruit blemishes.

Heirloom Marriage Marzineria

Heirloom Marriage Perfect Flame

Name	Days to maturity from transplant	Fruit characteristics	Growth	Comments
HEIRLOOM MARRIAGE™ COLLECTION				
Big Brandy F <sub>1</sub>	75-80	Beefsteak, pink 12-15 oz./350-425 g	I	Big, pink fruit with outstanding flavor is a cross of Big Dwarf and Brandywine. Best in-ground.
Cherokee Carbon F <sub>1</sub>	75-80	Beefsteak, purple 10-12 oz./280-350 g	I	Robust purple beefsteak with rich flavor. A cross of Cherokee Purple and Carbon. Best in-ground.
Genuwine F <sub>1</sub>	70-75	Slicer, red 10.5-11.5 oz./300-330 g	I	Big red slicer tomato is a cross of Costoluto Genovese and Brandywine. Ready to harvest 12 to 19 days earlier than Brandywine! Best in-ground.
Marzineria F <sub>1</sub>	70-75	Roma/Paste, red 3-4 oz./85-113 g	I	Red roma/paste tomato produces large yields of meaty fruit that are great for cooking. A cross of San Marzano and Cream Sausage. Best in-ground.
Perfect Flame F <sub>1</sub>	65-70	Saladette, orange 2-3 oz./55-85 g	I	Orange saladette tomato with sweet-tart fruitiness. Earliest-ripening Heirloom Marriage variety. A cross of Peron and Flamme. Best in-ground.

Growth: CD - Compact Determinate, CI - Compact Indeterminate, D - Determinate, I - Indeterminate, SD - Semi-determinate

fresh

tomatoes

Little Tomato Collection L to R: Little Napoli, Little Bing (p 12) and Little Sicily

Name	Days to maturity from transplant	Fruit characteristics	Growth	Disease resistance	Comments
SLICER					
Homeslice F <sub>1</sub>	60-65	Round, red 5-6 oz./140-170 g	D	HR: F1, V	Vigorous, compact variety produces very early and bountiful yields of exceptional slicers. Perfect for patio containers and small gardens.
Little Sicily F <sub>1</sub>	60-65	Round, red 3-4 oz./85-113 g	CD		Companion to Little Bing and Little Napoli, the compact, sturdy plants produce the majority of ripened fruit over a few weeks for a large harvest. Abundant, good-tasting, small red slicer tomatoes are great eaten fresh or used in recipes. Best in containers, with or without a trellis.
Stellar F <sub>1</sub>	70-75	Round, red 5-7 oz./140-200 g	D	HR: F2, LB, V IR: EB, SLS	The perfect slicer for areas with high disease pressure; highest level of disease resistance occurs when planted apart from other tomatoes. Produces lots of round, red fruit that is perfect for all uses. Best in-ground; benefits from trellis for support.
ROMA/PASTE					
Little Napoli F <sub>1</sub>	60-65	Red 2-2.5 oz./55-70 g	CD	HR: F1, V	One of the only patio romas, with disease resistance for better garden success. High yields for such a small plant - harvest enough at one time for a batch of salsa or sauce. Best in containers.
Sunrise Sauce F <sub>1</sub>	55-60	Orange 3-4 oz./85-113 g	D	HR: F1, V	The only professional non-heirloom orange roma/paste/cooking tomato on the market. Yields large amounts at one time to harvest enough to make a batch of sauce or salsa. Small plants are ideal for small-space gardens and large containers. Easy-to-peel tomatoes are sweet and meaty, with a taste like traditional romas. Best flavor comes with cooking; can also be enjoyed fresh. Best in-ground.
BEEFSTEAK					
Tidy Rose F <sub>1</sub>	60-65	Pink 5-7 oz./140-200 g	CI		Popular Tidy Treats has a deep pink beefsteak companion - both remain compact like a determinate but produce like an indeterminate. Beautiful ribbed fruit with rich heirloom flavor are perfect for any culinary use. Best in containers or in-ground, grown with support.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance  
Disease codes: EB - Early Blight, F1 - Fusarium Race 1, F2 - Fusarium Race 2, LB - Late Blight, N - Nematodes, SLS - Septoria Leaf Spot, TMV - Tobacco Mosaic Virus, ToMV - Tomato Mosaic Virus, V - Verticillium  
Growth: CD - Compact Determinate, CI - Compact Indeterminate, D - Determinate, I - Indeterminate, SD - Semi-determinate

Name	Days to maturity from transplant	Fruit characteristics	Growth	Disease resistance	Comments
CURRANT					
Candyland Red	55-60	Red 0.5 in./1 cm	I		Stays compact and tidy, so it won't take over like the other sprawling currants; easy to grow and earlier, too. Branched trusses make for accessible harvest and fruits detach without damage for more usable fruit. Very high yields of tiny, red fruit deliver very sweet flavor. Best in-ground. <i>All-America Selections National Winner.</i>
CHERRY					
Chocolate Sprinkles F <sub>1</sub>	50-55	Elongated, medium, dark red with green stripes 1 x 1.5 in./3 x 4 cm	I	HR: F1, N, TMV, ToMV	First in this type with a disease-resistance package. Unique dark red with green stripe exterior and purple flesh color. Produces more fruit with better flavor than similar O.P. varieties. Best in-ground.
Little Bing F <sub>1</sub> <small>(pictured on p 10)</small>	60-65	Round, medium, red 1 in./3 cm	CD	HR: F2, V	Part of the Little Collection of dwarf determinate varieties. Fruit sets and ripens over a period of a few weeks, allowing harvest of many tomatoes at one time. Yields large amounts of flavor-filled, red cherry tomatoes for fresh eating or to add to recipes. Best in containers, with or without support.
Micro-Tom	50	Round, small, red 0.5-0.75 in./1-2 cm	CD		Novelty variety produces an extremely dwarf plant covered with sweet fruit. Well-suited to 3 to 4-in./8 to 10-cm pot production. Best in containers.
Midnight Snack F <sub>1</sub>	65-70	Round, medium, red with black overlay 1.5 in./4 cm	I		Unique cherry tomato ripens red with an overlay of glossy black-purple on the skin when exposed to sunlight due to the accumulation of anthocyanin pigment. Sure to capture attention at retail and on the farm stand! Productive all season, yielding fruit that is well-balanced and flavorful. Great in salads or eaten straight off the plant, Midnight Snack is a guilt-free treat any time of the day or night. Best in-ground, grown with support. <i>All-America Selections National Winner.</i>
Orange Zinger F <sub>1</sub>	60	Round, large, dark orange 1.5-2 in./4-5 cm	I	HR: F1, TMV, ToMV	Crack-resistant variety yields more usable fruit than Sungold. The high quality, tasty, dark orange tomatoes have big tomato flavor with a balance of sweet and tangy. Best in-ground.
Sugar Rush F <sub>1</sub>	50-55	Elongated, medium, red 0.75-1.25 in./2-3 cm	I	HR: F1, TMV, ToMV	Super-sweet elongated fruit has one of the highest Brix ratings of this type. Fast-maturing and very productive all season. Long trusses of fruit with great flavor and texture. Best in-ground.
Tidy Treats F <sub>1</sub>	50-55	Round, small, red 0.75-1 in./2-3 cm	CI	HR: F1, V	Tons of fruit power on a compact plant! Good in small-space gardens and containers but unlike other patio types, continues to produce red cherry tomatoes all season. Habit stays compact like a determinate but produces like an indeterminate. Best in containers or in-ground grown with support.
Topsy Tom F <sub>1</sub>	50	Round, medium, red 1 x 1.25 in./3 cm	SD		Perfect for "upside down" and traditional planters. Compact/ mounded. Pliable stems ship well, hold abundant fruit, won't break in wind. Continues to put out branches with many trusses of split-resistant, sweet fruit.
Tumbler F <sub>1</sub>	49	Round, medium, red 1.25 in./3 cm	D		A superior variety for baskets and containers has graceful, cascading habit. Prolific, extra-early plants produce up to 6 lbs./2.7 kg of very sweet cherry tomatoes.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance  
Disease codes: EB - Early Blight, F1 - Fusarium Race 1, F2 - Fusarium Race 2, LB - Late Blight, N - Nematodes, SLS - Septoria Leaf Spot, TMV - Tobacco Mosaic Virus, ToMV - Tomato Mosaic Virus, V - Verticillium  
Growth: CD - Compact Determinate, CI - Compact Indeterminate, D - Determinate, I - Indeterminate, SD - Semi-determinate

## MULTI-SPECIES & SINGLE-SPECIES MULTI-PELLETS

### SimplySalad® Series

Height: 12 in./30 cm

Spread: 12 in./30 cm

Supplied as multi-pellets, with 3 or more seedlings per pellet.

Arugula, Cress and Kale Storm Mixture are supplied as Precision™ Multi-Pellets.

- SimplySalad introduced the first multi-species multi-seed pellets for salad, and now also offers single-species Arugula and Cress in the lineup!
- Easy to grow with very quick crop times and only one pellet needed.
- Can be direct-sown in 4 to 6-in./10 to 15-cm pots and color bowls.
- Produces more vivid colors when finished cool.
- Gardeners will enjoy as both a colorful, mixed-texture ornamental and a delicious, nutritious edible. Performs best for consumers in full sun in cool weather, or partial shade as temperatures warm up.
- Best in containers.

**Alfresco Mixture** Red and green leaf lettuces with arugula, endive and radicchio.

**Arugula** (*Eruca sativa*) Quick to establish, upright variety with a mix of lobes and smooth shapes – perfect for bunching. Harvest as young leaves with a mild, nutty flavor; leaves become spicy as they mature or are exposed to high temperatures. Precision Multi-Pellets assure high germination uniformity, making this a great variety for hydroponic systems. Height/spread: 12 to 18 in./30 to 46 cm.

**City Garden Mixture** Red and green lettuces.

**Cress** (*Barbarea verna*) Rosette-forming plants stay in a neat, tidy bunch for many weeks before flowering. Leaves have a great lobe shape and spicy flavor perfect for salads or braising. Precision Multi-Pellets assure high germination uniformity, making this a great variety for hydroponic systems. Height: 6 to 12 in./15 to 30 cm; spread: 8 to 12 in./20 to 30 cm).

**Global Gourmet Mixture** Red and green leaf lettuces with spicy Asian greens.

**Kale Storm Mixture** The first all-kale SimplySalad includes an attractive mix of textures and colors, including purple, green and blue. Lasts longer in the container than lettuce and won't bolt. Can also be planted in the ground for all-season harvest. Height/spread can reach up to 24 in./61 cm.

**Summer Picnic Mixture** A season extender! Heat-resistant, late-bolting mix of red and green lettuces.

**Wonder Wok Mixture** Mix of Asian greens including mustards, kale and bok choy.

A seed first! SimplySalad multi-pellets produce a well-balanced salad mix with one sowing.

Precision Multi-Pellet Standard Multi-Pellet

Dolce Fresca Sweet Italian Basil All-America Selections National Winner

**BASIL** ☀️  
*Ocimum basilicum*

### Everleaf Genovese

Height: 18 to 24 in./46 to 61 cm  
Spread: 12 to 18 in./30 to 46 cm

Seed supplied as: Raw

Days from transplant to harvest: 30 to 45

Available as "Pesto Party" in North America.

- Flowers up to 8 weeks later than standard basil.
- The first basil bred for season-long performance and continual harvesting.
- Well-branched variety with short internodes makes a beautiful columnar plant with huge harvest potential that stays tidy in both in-ground or container gardens.
- Robust Genovese flavor stands up to cooking – perfect for pesto and adding to sauce.
- Intermediate resistance to Downy Mildew and standard resistance to Fusarium make it a standout in any garden!

### Dolce Fresca

Height: 12 to 14 in./30 to 36 cm  
Spread: 10 to 12 in./25 to 30 cm

Seed supplied as: Raw

Days from transplant to harvest: 28

- Mid-size plant has a unique bushy habit with shorter internodes that shows better at retail than traditional basil and holds its controlled size in the garden without getting tall and leggy.
- More usable leaf yields, with traditional sweet Genovese basil flavor.
- Best in-ground and in containers.

Everleaf Genovese Basil

Sweet Dani Lemon Basil All-America Selections National Winner

### Purple Ruffles

Height: 18 to 24 in./46 to 61 cm  
Spread: 18 to 24 in./46 to 61 cm

Seed supplied as: Raw

Days from transplant to harvest: 28

- Ornamental variety has fragrant, ruffled, deep purple leaves with mild anise flavor.
- Best in-ground and in containers.

### Sweet Dani Lemon

Height: 22 to 24 in./56 to 61 cm  
Spread: 18 to 24 in./46 to 61 cm

Seed supplied as: Raw

Days from transplant to harvest: 28

- Flavorful and fragrant – up to 75% more total essential oils than standard lemon basil.
- Vigorous garden performer.
- Best in-ground and in containers.

Purple Ruffles Basil All-America Selections National Winner

Fernleaf Dill All-America Selections National Winner

**DILL** ☀️  
*Anethum graveolens*

### Fernleaf

Height: 12 to 15 in./30 to 38 cm  
Spread: 10 to 12 in./25 to 30 cm

Seed supplied as: Raw

Days from transplant to harvest: 28

- Perfect for patio planters – dwarf, compact plants don't need staking and won't topple over.
- Can also be grown in-ground and used for traditional culinary purposes.
- Late flowering allows for a long harvest season and extended ornamental period.

tasty

SimplyHerbs Dill

SimplyHerbs 'Try Basil'

SimplyHerbs Basil

SINGLE-SPECIES  
MULTI-SEED PELLETS ☀

**New!** SimplyHerbs Dill, Curled Parsley, Large-Leaf Italian Flat Leaf Parsley and Rosemary are now available as Precision™ Multi-Pellets, joining Basil, 'Try Basil' and Sage with this upgraded seed form.

For Growers, this offers reliable plug production, improved order fill rate, uniform quality in plug trays and improved margin, meaning more sales.

For Hydroponic Growers, this offers a higher percentage of transplantable plugs and more uniform finished product.

All varieties are best in-ground and in containers.

SimplyHerbs Rosemary

SimplyHerbs Large-Leaf Italian Flat Leaf Parsley

SimplyHerbs Curled Parsley

“Tested Nationally  
& Proven Locally”

Many of PanAmerican Seed's vegetables and herbs have been named winners by one of the most prestigious organizations in the industry: **All-America Selections**.

Look for the All-America Selections Winner logos throughout this brochure. These are varieties that gardeners and fresh market farmers can count on as proven for their superior garden performance in independent, unbiased field trials across North America. Selling success is almost guaranteed, thanks to the built-in promotions by the AAS organization every year for these top-notch varieties.

SimplyHerbs Oregano

SimplyHerbs Sage

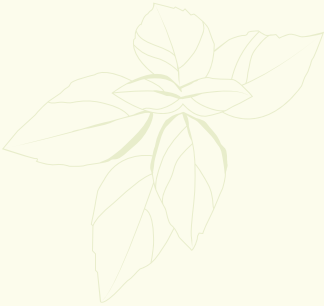

SimplyHerbs Thyme

SimplyHerbs Basil and 'Try Basil' grown with Precision Multi-Pellets in hydroponic production.

The Hydroponic  
Advantage

Our Precision Multi-Pellets are the perfect way to get a uniform crop of hydroponic herbs, whether you hand or machine sow. It's as easy as placing one pellet in a plug and watering in. Each multi-seeded pellet contains the right amount of seed to get a fast, full finished product to send to market.
