

Solstice Series Snapdragon

Super early Solstice flowers 30 to 60 days earlier under short days than other intermediate, Winter-flowering varieties.

Solstice Mixture Snapdragon

PanAmerican Seed™

SNAPDRAGON

Antirrhinum majus

Solstice Series

A Cool Season Thrivers selection!

Height: 16 to 20 in. (40 to 50 cm)

Spread: 10 to 14 in. (25 to 35 cm)

Supplied as seed with a 90% Yield

Potential rating.

"Knee high" height makes Solstice great for landscapes and garden cut flowers. Series performs best with high light and cool nights (lower than 55°F/13°C), producing optimum stem strength. Good for Jumbo packs, pots and gallon containers (8-in./20 cm standard pots). Recommended sowing in the Northern Hemisphere is September through January for finished plants as late as the end of March. In the Southern hemisphere, sow March through July.

Burgundy

Lavender

Orange Tricolour Orange flowers with a yellow bee and white tube.

Pink

Purple

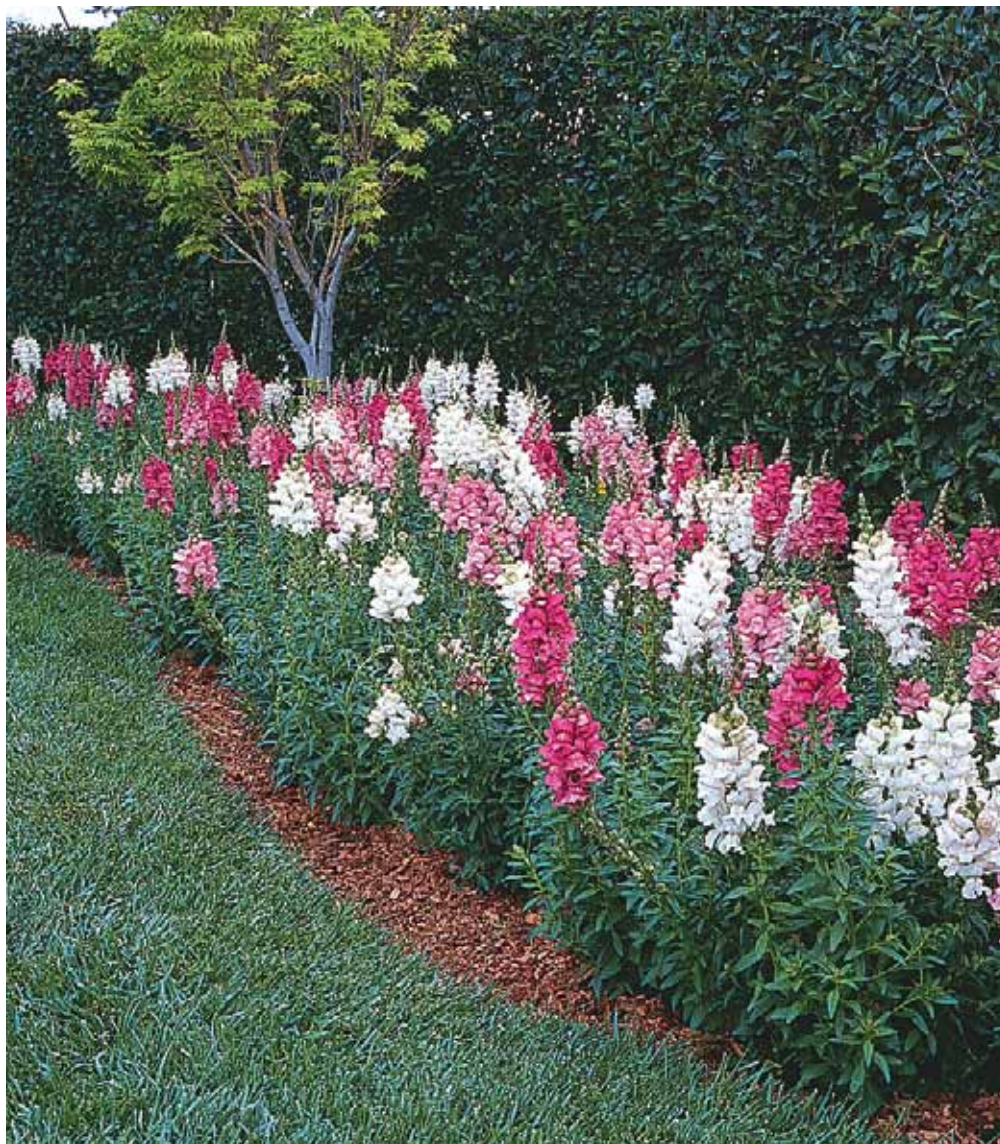

Red Deep red flowers with yellow bee.

Rose Medium rose.

White Flowers are marked with a yellow bee; slight pink blush is most noticeable in the buds.
