

Magic Matricaria's tall, strong stems allow you an easy harvest

Magic White Matricaria

Magic produces stems that are stronger and more upright with multiple flowers and darker green foliage than other varieties.

PanAmerican Seed™

MATRICARIA 
Tanacetum parthenium

Magic Series

Height: 28 to 36 in./70 to 90 cm
Supplied as easy-to-sow pelleted seed with 80% minimum germination standard.

Magic features small disks and extended ray petals on each flower which produce a starlike appearance. Tall, straight stems and flower pedicels are strong, resisting breakage and allowing for easier harvest with less tangling. Magic is an excellent choice for use as filler in mixed arrangements. Long day-flowering plants need a 16 to 18-hour daylength to flower and achieve height using night interruption; will rosette in short days with less than 14 hours. Production under full sun results in shorter stem length compared to production under shade. Series requires 9 to 10 weeks from transplant to harvest.

Lime Green 225185
Single 92551
White 225187
Yellow 277504
