Gerbera Revolution™ F_1 Series

(Gerbera jamesonii)

Potted Plants Culture (revised 10/14/25)

Right on time – every time!
Flower timing is synchronized across the colour range in each Revolution series, so your product flows smoothly. No surprises…you grow, pick, pack and ship just as you planned. High uniformity enables a consistent, fully programmable, high-density crop year-round.

Plug crop time: 6 to 7 weeks
Transplant to finish: 8 to 10 weeks

- Revolution is the leading standard-size pot gerbera, with uniformity of flowering window across a complete colour range.
- Industry-leading seed quality.
- Better second flush of flowers than the competition assures much longer bloom time for the consumer.
- Best for 5-in./13-cm pots.

Propagation Key Tips

Don't water with cold water. Use water with a temperature at least 60°F/16°C or higher. Watering with cold water will result in deformed leaves and will disturb plant growth. Do not pot too deeply when transplanting, as this may result in Crown Rot. Space plants when the leaves of the plants are touching each other, generally 5 to 6 weeks after transplanting.

Growing on to Finish

5"/6"/1 Gallon/15 cm	1 (ppp)	9-10 (weeks)	Autumn	daminozide 1,000-2,500 ppm Spray
5"/6"/1 Gallon/15 cm	1 (ppp)	10-11 (weeks)	Winter	daminozide 1,000-2,500 ppm Spray

Fertiliser Notation

Reduce nitrogen (N) in fertiliser mix at bud initiation stage until flowering for better plant control.

Common Problems

Gerbera is very sensitive to Thrips. Zero tolerance is recommended. Also watch for Whiteflies, Leaf Miners, Spider Mites and other insects. It is recommended to start spraying against insects right after transplant.

Finishing Key Tips

Use 4.5 to 5.5-in. (11 to 14-cm) pots for standard Revolution. Fill pots all the way to a uniform soil level. When transplanting, do not plant too deep, as this may result in Crown Rot. Space plants when leaves are touching, generally 5 to 6 weeks after transplanting. To reduce stretching, use daminozide at 1,000 to 2,500 ppm 1 to 2 times with an interval of 9 to 10 days. Stop use after seeing the first flower buds.

NOTE: Growers should use the information presented here as guidelines only. PanAmerican Seed recommends that growers conduct a trial of products under their own conditions. Crop times will vary depending on the climate, location, time of year, and greenhouse environmental conditions. It is the responsibility of the grower to confirm the treatment is available in their region as well as read and follow all the current label directions relating to the products.
