

## Impatiens Beacon® F<sub>1</sub> Series

(*Impatiens walleriana*)

Annuals Culture (revised 12/12/24)

### Beacon strength in bright new colours

Beacon announces two new colours to light up the shade. **NEW Blue Pearl** and **NEW Light Pink** have been trialed and approved to grow well and look vibrant in the shade, and they offer **high resistance** to the widely prevalent populations of *Plasmopara destructor*, the cause of Impatiens downy mildew. Beacon Impatiens are suitable for packs, pots, hanging baskets and in-ground beds. Visit [beaconimpatiens.com](https://beaconimpatiens.com) for more details on the Beacon story.

**Plug crop time:** 4 to 5 weeks

**Transplant to finish:** 3 to 4 weeks

- Exhibits high resistance to the widely prevalent populations of *Plasmopara destructor*, which cause Impatiens downy mildew (IDM).
- Brings back into production a well-known, in-demand, easy-to-grow and versatile product for increased sales.
- Extensive trialing has proven that Beacon impatiens provides genetic high resistance to IDM. Beacon is not immune to IDM; there are scenarios where preventative IDM fungicides may be recommended.
- Easy to incorporate into production planning.
- Fast-filling, season-long colour for gardens and landscapes.
