Impatiens Beacon® F_1 Series

(Impatiens walleriana)

Annuals Culture (revised 12/12/24)

Better colour for bolder displays

Beacon announces **NEW Pink,** a vibrant colour to light up the shade, plus improved varieties, **NEW Orange Improved** and **NEW Violet Improved**. The popular series is trialed and approved to grow well and look vibrant in the shade and offers **high resistance** to the widely prevalent populations of *Plasmopara destructor*, the cause of Impatiens downy mildew. Beacon Impatiens are suitable for packs, pots, hanging baskets and in-ground beds. Visit ***beaconimpatiens.com*** for more details on the Beacon story.

Plug crop time: 4 to 5 weeks
Transplant to finish: 3 to 4 weeks

- Exhibits high resistance to the widely prevalent populations of *Plasmopara destructor*, which cause Impatiens downy mildew (IDM).
- Brings back into production a well-known, in-demand, easy-to-grow and versatile product for increased sales.
- Extensive trialing has proven that Beacon impatiens provides genetic high resistance to IDM. Beacon is not immune to IDM; there are scenarios where preventative IDM fungicides may be recommended.
- Easy to incorporate into production planning.
- Fast-filling, season-long colour for gardens and landscapes.
