

Pepper Mad Hatter F₁

(*Capsicum baccatum*)

Vegetables Culture (revised 09/17/20)

- Flat-disc peppers are crunchy and crisp, with a delicate floral scent and rich flavour that intensifies/sweetens as it matures.
- In hot, dry climates, a small number of fruit will have a touch of heat close to the seed cavity, but fruit wings are always sweet.
- Best in-ground with support.
- *All-America Selections National Winner.*

Fertilizer Notation

Peppers are very sensitive to high salts, particularly high ammonium, during germination. Keep ammonium levels to less than 10 ppm.

Propagation Key Tips

Height can be controlled by withholding fertilizer, avoiding overwatering, growing under high light conditions and using DIF when possible. If necessary, uniconazole (Sumagic) at the rate of 2.5 to 5 ppm can be applied at 2 weeks after sowing for height control. Repeat 2 weeks later if needed.
