

Petunia Ez Rider[®] F₁ Series

(*Petunia x hybrida*)

Annuals Culture (revised 01/14/21)

Grandiflora Ez Rider and multiflora Lo Rider put flexibility at your fingertips and cost savings in your pocket, thanks to their matched and manageable growth from bench to retail. These genetically shorter, more controlled plants need less PGRs and are perfect for high-density programs. The two series solve the seasonal, geographic and control challenges of traditional petunias – they're perfect for growing and selling high-density cell packs to "promo" hanging baskets.

Plug crop time: 4 to 5 weeks

Transplant to finish: 5 to 6 weeks

- Up to half the amount of PGRs are needed – or none under some growing regimes.
- Suitable for cold growing.
- Tight bloom window lets you ship and sell all series colours at the same time.
- Better branching with improved airflow reduces the probability of disease, especially *Botrytis*.
- Available in the top-selling colours that make up 75% of petunia sales.
- Enhanced, longer garden performance in containers and gardens – plants hold together and don't lodge later in the season like traditional petunias can.
