

Pepper Candy Cane Chocolate Cherry

F₁

Vegetables Culture (revised 01/19/21)

(*Capsicum annuum*)

Stand out with unique foliage

Candy Cane Chocolate Cherry's variegated foliage stands out among all other vegetables at a young plant size. As the plant matures, green fruit with a unique white stripe changes to chocolate and cherry red. Be sure to add this stunning variety to your vegetable program.

- Mini bell pepper plant has unique, eye-catching variegated foliage.
- Early-maturing fruit ripens from green and white stripes to unique chocolate and cherry red stripes.
- Sweet flavour and crisp texture make it perfect for fresh eating at any stage of ripeness.
- Best in containers or in-ground, with or without support.

Fertilizer Notation

Peppers are very sensitive to high salts, particularly high ammonium, during germination. Keep ammonium levels to less than 10 ppm.

Propagation Key Tips

Height can be controlled by withholding fertilizer, avoiding overwatering, growing under high light conditions and using DIF when possible. If necessary, uniconazole (Sumagic) at the rate of 2.5 to 5 ppm can be applied at 2 weeks after sowing for height control. Repeat 2 weeks later if needed.
