IPM Essen 2020

Date: 1/27/2020 - 1/31/2020

Location: Essen, Germany

This year PanAmerican Seed will be again on display during IPM Essen! The international trade fair for plants is the world's leading trade fair for horticulture. It is the only specialist trade fair of its kind to cover the entire value chain of plants, including production, technology, floristry, garden features, and the point of sale.

Come and visit the beautiful and colourful PanAmerican Seed display at booth B29 in Hall 2. This year we will show the new Impatiens Beacon series, which is highly resistant to Impatiens downy mildew. Next to this wonderful introduction we will present our series of Osteospermum Akila with NEW Sunset Shades, which includes popular colours like yellow, magicians and rose-reds, plus salmon, apricot and orange shades. For the perennial-lovers we will show the award-winning Leucanthemum Madonna and the stunning Salvia Salvatore Blue with the largest spikes and the deepest blue-coloured calyx you have ever seen.

Discover our company and products by visiting our booth and meet with our Sales-team!

We hope to see you Jan. 28-31 in Essen, Germany! For more information, visit the event website: www.ipm-essen.de or contact us by e-mail eventseu@panamseed.com.
