

## Tomato Little Sicily F<sub>1</sub>

(*Solanum lycopersicum*)

Vegetables Culture (revised 10/18/24)

### Little Collection = Big Success!

Our Little Collection features compact determinate tomato plants with a compact, tidy habit and healthy green foliage that looks good in the store and on the patio. At less than 2 ft./61 cm tall, this tasty trio flourishes in mid-size containers, stays a manageable size and produces lots of tomatoes at the peak of Summer.

- Companion to Little Bing and Little Napoli, the compact, sturdy plants produce the majority of ripened fruit over a few weeks for a large harvest.
- Abundant, good-tasting, small, red slicer tomatoes are great eaten fresh or used in recipes.
- Best in containers, with or without a trellis.

### Fertiliser Notation

Tomatoes are very sensitive to high salts, particularly high ammonium, during germination. Keep ammonium level to less than 10 ppm.

### Propagation Key Tips

Height can be controlled by withholding fertiliser, avoiding overwatering, growing under high light conditions and using DIF when possible. Little Sicily is naturally compact and should not need PGRs.
