Propagation Key Tips

Total crop time can be reduced by 1 week by directly sowing into the final container. It is important to keep soil consistently moist until germination occurs so pellet can adequately break down.

Growing on to Finish

| 12" Pot or HB/5 Gallon/30 cm | 5-6 (ppp) | 4-6 (weeks) | Spring | - |

Finishing Key Tips

Can be directly sown into final container. To achieve faster production with good foliage colour, SimplySalad can be grown at moderate to warm temperatures (55 to 70°F/13 to 21°C), and then finished at 45 to 55°F (7 to 13°C) for 3 to 5 days. Coloured varieties develop pigment very quickly at cooler temperatures.
