(*Cucumis sativus*)

Buy. Eat. Repeat!

The Kitchen Minis™ collection includes potted vegetable plants consumers can grow inside on a sunny windowsill or counter, without a garden!

Easy-to-grow Kitchen Minis encourage consumers to harvest and enjoy their own homegrown indoor vegetables, with a fresh harvest over a few weeks!

- Plants benefit from being trellised to keep upright and pinched when plant reaches top of trellis.
- Deliciously crisp and sweet cucumbers for your recipes! Eat fresh off the plant, or add to a vegetable platter or fresh salad.
- Produces handfuls of small, cocktail-sized cucumbers over a few weeks.
- Parthenocarpic variety will set fruit without a pollinator! Perfect for growing indoors or on a balcony. If grown on its own, fruit will be seedless. If grown next to other cucumbers with male flowers, there is potential to set seed.
- Be sure to place it in a location with high light and keep well-watered to allow fruit to mature.
- For best flavour, pick when fruit is 1.5 to 2.5 in./4 to 6 cm long.

Finishing Key Tips

For 6-in./15-cm production for sale with fruit on, direct-sow into final container. Vining plants can be trained up a 12 to 16-in./30 to 41-cm trellis to save garden space. Pinch at top of the trellis to promote fruiting. For cell packs and 4-in./10-cm production, sell as a young plant to be transplanted in the ground or in patio pots. Best performance is in patio pots.
